

Kidney Donor Needed

Many of you may already know that Father Bob will need a kidney transplant. He is in need of a living donor. And that person just maybe you. Even to consider becoming a donor is no small thing. Medical testing is required to determine if you would be a "match." The link below will take you to the DHMC kidney donor webpage containing a short list of basic requirements, what you can expect as a donor, and a form you can fill out on-line if you wish to be screened. The sooner a donor can be found, the sooner Father Bob can return to full health.
